

IKI Collection by
Formica Group

The Little Red Book

The first and original

Formica Group invented high pressure laminates in 1913. Pioneers by definition, our iconic Formica® brand represents the quintessence of laminates.

Inspired by life

Laminates entered people's daily lives and made modernity dreams come true and accessible. Similarly, the demand for multifunctional, practical and durable designed surfaces is a constant inspiration for our Formica® Collections. At rest, at leisure, at work.

Evolving with the times

The way people live, work and play continuously changes. Formica Group keep pace with these evolving times through constant innovation, reflecting global trends and responding to ever changing needs and habits. The true original, still surfacing the world.

Ensimmäinen ja alkuperäinen

Formica Group kehitti korkeapainelaminaatin vuonna 1913. Uraauurtava ikoninen Formica®-brändi edustaa laminaattien olennaisinta ydintä.

Elämän inspiroima

Laminaatit tulivat osaksi ihmisten elämää ja tekivät nykyajan unelmista saavutettavia. Formica® Iki -mallistomme saavat jatkuvasti inspiraatiota monikäyttöisten, käytännöllisten, kestävien ja koristeellisten pintaratkaisujen tarpeesta. Niin työssä ja vapaa-ajallakin.

Kehittyy ajan mukana

Ihmisten tavat elää, työskennellä ja viihtyä muuttuvat jatkuvasti. Formica Group pysyy kehityksen vauhdissa jatkuvalla innovoinnilla, joka heijastaa globaaleja trendejä ja vastaa alati muuttuviin tarpeisiin ja tottumuksiin. Aito alkuperäistuote on edelleen suosittu pintamateriaali ympäri maailmaa.

Visit formica.com, or formica.info for technical data, as the most up-to-date source of information. Formica does not warrant that the information in this document is suitable for your specific purpose. Colour system notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. When exact colour information is required, please always refer to an actual laminate sample in the specified finish.

Not all certifications stated are applicable or available for all Formica® products. Please check that the product you require is covered by a relevant certification or is suitable for your specific application, in advance of order placement.

Colour system notations

NCS® and RAL Classic notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. NCS and RAL Classic notations provided have been established from a standard matt laminate sample. Please note that different surface finishes (texture structure and gloss levels) can have an effect on colour perception. When exact colour information is required, or for cross-material matching (HPL to other materials), please always refer to an actual laminate sample in the specified finish.

Light Reflectance Value

Light Reflectance Value (LRV) is a value indicating the proportion of light reflected by a colour, when measured under standard daylight conditions. This guidance uses a scale of 0-100, where 0 = black and therefore total light absorption, whereas white = 100 and therefore total light reflection. The main purpose of this value is to indicate measured colour contrast between two surfaces, which need to be readily distinguishable within

an environment (under static conditions, a difference of 30 units between two colours is considered adequate). LRVs stated may or may not be exact and are provided for guidance only.

Please note

For non-solid colour decors, where there are multiple colours across the design, the stated LRV is an average value taken from multiple measurements across the decor and must be used with caution. The individual colours in a pattern, woodgrain or stone design can differ more than 30 LRV units within the design itself.

Yleistä

Formica Groupin ("Formica") tässä asiakirjassa antamat tiedot ovat vain viitteellisiä. Tässä esitteessä annetut tiedot ovat pitäneet paikkansa julkaisuhetkellä. Tuotetiedot voivat kuitenkin muuttua tulevaisuudessa, sillä kehitämme ja parantelemme tuotteitamme jatkuvasti. Verkkosivustomme formica.com (tai teknisten tietojen osalta formica.info) on ajantasaisin tietolähde. Formica ei takaa, että tähän asiakirjaan sisältyvät tiedot sopivat asiakkaan käyttötarkoitukseen. Värijärjestelmien merkinnät ilmaisevat kunkin järjestelmän sävyjen lähimpiä vastaavuuksia. Tarkkaa vastaavuutta ei voi taata, ja merkinnät ovat vain ohjeellisia. Mikäli tarkka väri täytyy tietää, tulee aina käyttää laminaatin näytekappaletta, jossa käytetään haluttua pintamuotoa.

Kaikki ilmoitetut sertifiointit eivät koske kaikkia Formica®-tuotteita. Tarkista jo ennen tilauksen tekemistä, että tarvitsemallasi tuotteella on asianmukainen sertifiointi tai että se soveltuu suunniteltuun käyttökohteeseen.

Värijärjestelmien merkinnät

NCS®- ja RAL Classic -merkinnät ilmaisevat kunkin järjestelmän sävyjen lähimpiä vastaavuuksia. Tarkkaa vastaavuutta ei voi taata, ja merkinnät ovat vain ohjeellisia. Ilmoitetut NCS- ja RAL Classic -merkinnät on määritetty standardilaatuisen mattapintaisen laminaattimallipalan perusteella. Huomaa, että pintamuoto (pintastruktuuri ja kiillon määrä) voi vaikuttaa siihen, miltä värit näyttävät. Mikäli tarkka väri täytyy tietää tai tuote halutaan sävyttää muihin materiaaleihin (korkeapainelaminaatti tai muut materiaalit), tulee aina käyttää laminaatin näytekappaletta, jossa käytetään haluttua pintamuotoa.

Valonheijastavuus

Valonheijastavuus (LRV) ilmaisee, kuinka paljon valoa väri heijastaa mitattuna vakiotyyppisessä päivänvalossa. Arvon kanssa käytetään asteikkoa 0–100, missä 0 = musta, eli väriä ei heijastu lainkaan, ja 100 = valkoinen, eli valo heijastuu täydellisesti. Sen tärkein käyttötarkoitus on ilmaista mitattua värikontrastia kahden sellaisen pinnan välillä, joiden on erottauduttava tilassa (vakaina pysyvässä olosuhteissa riittäväksi katsotaan 30

yksikön ero kahden värin välillä). Annettu valonheijastavuusarvo on vain ohjeellinen, eikä se välttämättä ole tarkka.

Huomautus

Kun kyseessä on muu kuin yksivärinen kuvio, on tärkeää huomioda, että ilmoitettu LRV-arvo on pinnan eri kohdista mitattu keskiarvo, jota tulee käyttää harkiten. Pattern- , puusyy- tai kivikuosissa olevien yksittäisten värien välillä voi olla yli 30 LRV-yksikön ero saman kuosin sisällä.
